PROFESSIONAL SUMMARY

Final-year Computer Science student with hands-on experience building production-grade AI systems, scalable backend services, and cloud-native applications. Passionate about distributed systems, privacy-preserving computation, and applied machine learning. Proven ability to design and ship end-to-end solutions — from system architecture to deployment — across enterprise, research, and startup environments.

EXPERIENCE & LEADERSHIP

Founder — CarbonVerse (ClimateTech Startup) 2025 – Present

PIERC Cohort 9 Incubation, Parul University | Startup Grant Winner

- Designed and delivered an end-to-end AI + blockchain platform for carbon credit management — spanning product architecture, full-stack development, and deployment — securing PIERC Cohort 9 incubation and a startup grant.

AI/ML Intern — Cygnet.one June 2026 – July 2026

- Developed and deployed AI/ML model integrations via secure REST APIs and backend services, implementing authentication, encryption, and process automation to support enterprise-scale AI workflows.

Membership Chair — ACM Student Chapter, GLS University 2025 – Present

- Led technical events and mentorship initiatives, fostering an active community of **200+ student members**.

EDUCATION

GLS University, Ahmedabad 2023 – 2027

B.Tech in Computer Science & Engineering | CGPA: 8.75 / 10

SDA School (Seventh-day Adventist), Ahmedabad 2021 – 2023

Class XII (2023): 88% · Class X (2021): 93%

AWARDS & RECOGNITION

- National Winner** — Smart India Hackathon (SIH) 2025 · CoastScan, Computer Vision–Based Sand Classification
- Winner** — DRDO DIA-SVPCoE Hackathon 'Sampada 2025' · IoT Security Domain
- Winner** — Breach 2025 FinTech Hackathon, PDEU · AI Fraud Detection Engine & Rapid Prototyping
- Startup Grant Winner, Cohort 9** — PIERC Incubation, Parul University · CarbonVerse
- Finalist** — SSIP Vikas Saptah Hackathon · UrjaSetu (AI GUVNL Feedback Platform)
- Finalist** — Ingenium 2026, Ahmedabad University · GeoAnushasan
- LeetCode Expert** — Top 2.5% Globally · 610+ Problems Solved

PROJECTS

CoastScan — Computer Vision & IoT Sand Classification System [SIH 2025 · National Winner]

- Built a computer vision and IoT pipeline to automate beach sand classification, replacing manual analysis with cloud-integrated sediment detection. Python, Django, OpenCV, AWS.

VeriCred — Privacy-Preserving ZKML Credit Scoring

- Engineered a Zero-Knowledge ML credit scoring system where model inference runs fully on-device and proofs are verified on-chain, enabling privacy-preserving financial decisioning without exposing user data. PyTorch, Solidity, EZKL, Web3.js.

L3M — Privacy-Preserving Local AI Assistant

- Eliminated reliance on cloud-hosted AI services by building a privacy-first local AI assistant using a microservices architecture, custom MCP protocol, RAG pipeline, and on-device inference. Go, Python, Qdrant, Ollama, MCP.

AI-Powered Fraud Detection System [Breach 2025, PDEU · Winner]

- Developed a real-time ML-powered fraud detection engine to flag suspicious high-frequency transactions, winning the Breach 2025 FinTech Hackathon at PDEU. Python, Django, TensorFlow, MongoDB.

TECHNICAL SKILLS

Languages: Python | Java | C++ | JavaScript | TypeScript | SQL | Solidity

Frameworks: React | React Native | Flutter | Django | FastAPI | Flask | Node.js

AI / ML: PyTorch | TensorFlow | OpenCV | Scikit-learn

Databases: PostgreSQL | MongoDB | Firebase | Supabase

Cloud & DevOps: AWS | Docker | Git | GitHub

Core Skills: Data Structures & Algorithms | System Design | Distributed Systems | Cloud Computing | Blockchain & Web3

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate — Oracle
- AWS Academy Graduate – Cloud Foundations — AWS Academy
- ROBO-AI: 30-Day Industrial Training on Robotics & AI Simulation — My Equation (NVIDIA & Microsoft)
